

IntelliscopeSM, designed to meet the needs of corporate professionals who rely on high-value business information and superior tools to develop and refine their strategic direction, enables you to achieve a significant competitive advantage in today's dynamic marketplace. You'll be able to gain a solid understanding of your competition, evaluate mergers and acquisitions targets, uncover new business opportunities, assess market dynamics, and develop new products with confidence knowing that your decisions are backed by a wide range of critical analysis, expert opinions, and trend information.

Intelliscope's easy-to-use, Web-based interface delivers the information you need, when you need it, and the way you need it.

UNRIVALED ACCESS TO HIGH-VALUE CONTENT

We set the standard as the most comprehensive source of hard-to-find business information. Track more than 37,500 public and private companies in 33 key industries worldwide to gain a solid understanding of current business conditions and future trends—critical information that can help you better develop and refine your own corporate strategy and achieve a sustainable competitive edge.

With nearly 2 million reports in our content-rich databases, and over 1,500 new reports arriving each business day, you'll have access to the most expansive and unique content available today. Over 600 of the world's most trusted research sources—with privileged relationships at the executive level of corporations—supply full-text reports containing company and industry insight, analysis, and recommendations such as management outlooks, forecasts, and competitive landscape analysis.

In addition, that extensive broker research collection is supplemented by over 4 million First Call NotesTM, which encompass daily morning meeting minutes from Wall Street analysts, intraday research broadcasts, commentaries, and corporate news releases about important industry and company events. Over 2,300 new notes are added each business day, with up to 4,800 per day during earnings periods.

ADVANCED SEARCH FUNCTIONALITY

We understand that corporate professionals across the same organization have varying information needs and time constraints, so Intelliscope is designed on a single platform customizable to meet the specific needs of individual users:

Quick Search – Easily perform a cross-database, free-text search at any time from any screen.

Cross-Database Search – Expand your results perspective by searching across all content sets with specific criteria: free text, company, industry, geographic region, and/or date range.

Advanced Search – Further refine your results by searching each content set with specific criteria particular to that data.

Intelliscope accommodates varying degrees of user customization and is designed to enhance productivity by eliminating the need for repetitive searches:

Saved Searches – Increase your productivity by using saved searches, which allow you to locate and retrieve information without re-entering search criteria for every request.

Alerts – Save time by setting up alerts, which automatically deliver search results to you daily or on a specified day each week via Intelliscope or e-mail with links to new reports that meet your saved search criteria.

Account Profiles – For faster navigation, create default settings for viewing search results in a format that is relevant to you. Select how you would like the results to be sorted, the number

of citations you prefer to view on each page, the frequency of your e-mail alerts, and other options.

Result Screen Display Options – Dynamically update your search results screen without having to change your account settings. Re-sort by publication date, relevancy, or even by page count; switch back and forth between one-line Summary Citations and more comprehensive Detailed Citations; and choose the number of citations displayed on each page to optimize your results review process.

Intelliscope's time- and money-saving options help you decide which documents are most likely to meet your needs:

Relevancy Scores – Quickly determine which documents best match your search criteria. Each report is assigned a score based on the number of times a free-text phrase is found, how close that phrase is to the beginning of the document, and how large the document is to the number of instances the phrase appears. When you sort by relevancy, the reports with the highest score will appear at the top of your results list.

Report Preview – Find out what information a brokerage report contains before you download it—click on the Preview option to view the report's table of contents.

COST-EFFECTIVE APPROACH FOR SHARING INFORMATION

To fully leverage our high-value content requires the ability to quickly, easily, and cost-effectively locate, organize, and share information:

Post and Share – Create folders customized to your business needs to select, organize, and store report citations, and share that information with specific individuals or selected departments within your organization. The Post and Share folders can be accessed directly through the product or via a link on your intranet.

Flexible Delivery Options – Distribute information across your entire enterprise via your corporate intranet. Search criteria are pre-defined according to the companies and industries you wish to track. Indexed reports are automatically delivered to you daily via your choice of HTML, e-mail, or Lotus Notes® replication.

EASY ACCESS TO HELP

To help you save time and enhance productivity, we've made it easy to get the support you need. An online Help document, accessible from any screen in Intelliscope, provides detailed explanations on how to customize Intelliscope, perform searches, view and download reports, set up Saved Searches and Alerts, use Post and Share, and more.

Customers can also contact our client services department via phone or email for personal attention. Our U.S.-based client services team is available Monday through Friday, 8:30 a.m. until 8:00 p.m. EST, and our London-based team is available Monday through Friday, 8:30 a.m. until 5:30 p.m. GMT.
